### Question 27

What do you identify as the strengths of this instructor?

#### ▼ Collapse Responses

- ▶ identifying ways to improve our existing resume/portfolios. Many good ideas presented in the class that have been incorporated into my own resume.
- ▶ Pushes the student to achieve what they might struggle with.
- ▶ Very organized instructor
- ▶ Great to work with, and provided a well structured syllabus.
- ▶ Feedback was timely and excellent. Overall, the course work was relevant, rigorous, and thoughtful.
- ▶ The requirements for each assignment were clearly outlined, and I was aware of what information should be included in each assignment.
- ▶ Positive reinforcement teacher rather than a negative
- ▶ Assignment expectations very clear

### Question 28

What could the instructor do to improve this course?

#### ▼ Collapse Responses

- ▶ Course was very thorough as it is.
- ▶ Great content.
- ▶ N/A
- ▶ I wouldn't change a thing!
- ▶ The only thing that tripped me up was the due date for assignment 11 - Every other assignment was due on a Wednesday, this one was due on a Tuesday which I did not expect. Would have appreciated due dates on the assignments themselves.
- ▶ The home page each week should clearly define which assignments are due which days. I felt as though I had to look in multiple locations to make sure I didn't miss any assignments for the week.
- ▶ ?
- ▶ A previous course the entire class had the opportunity to hold an online meeting with professionals in our field was very informational both with the professionals recommendations and learning from classmates questions.

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

[Collapse Responses](#)

-  thorough directions of what was expected.
-  The instructor pushed for success.
-  The textbook reading
-  I found the course very interesting, and it's easy to focus when a well structured course is provided.

- ▶ The explanation for each assignment was greatly appreciated. Outside resources provided were very helpful. Feedback on assignments was timely and appropriate.

My wish for BSU is to provide assignments each week in one place for each course. The variety of instructor methods makes it difficult to keep track each week of assignments. I just feel that with the electronic format, standardization each week of an assignment list would be greatly helpful to eliminate time checking and rechecking what each instructor requires each week.

- ▶ Assignments that were not overly demanding but encouraged participation in field related areas. This forced you not only to learn but to step out into your career choice and see what it has to offer.
- ▶ Book and Assignments

### Question 42

What made learning difficult for you?

#### ▼ Collapse Responses

- ▶ No problems.
- ▶ Putting personal goals and achievements to the learning content.
- ▶ N/A
- ▶ I am one of those people who learns by doing things hands-on. I can read some things over and over again and it still doesn't sink in. It's easy to get sidetracked at times!
- ▶ Assignment 11 had an odd due date and the Assignment list was not showing correct dates for approximately the last half of the semester.
- ▶ Stepping out into the electronic world was scary for me but also has made big strides in developing my professional image.
- ▶ None

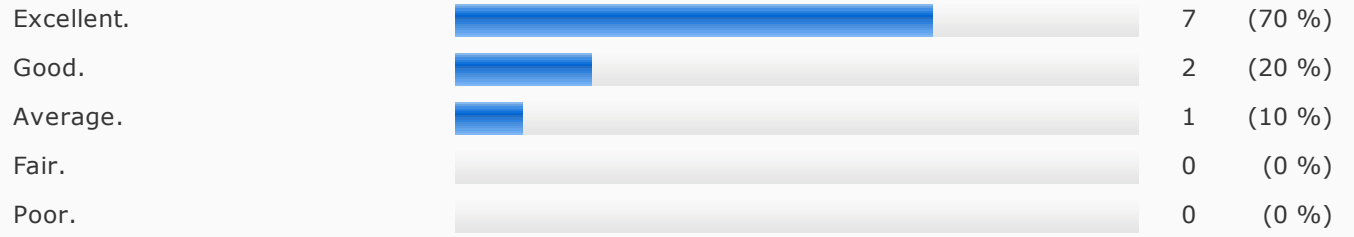

### Question 43

What suggestions do you have for future offerings of this course?

- ▶ more offerings
- ▶ Great course!
- ▶ N/A
- ▶ Nothing comes to mind. I really enjoyed the course I look forward to taking future classes with the instructor!
- ▶ Just that the adaptation of dates in D2L for the course to the current semester would be helpful.
- ▶ List all requirements for the week on the home page.
- ▶ Maybe a little clarity on assignments. Previous student projects help to demonstrate expectations. The "best project" posts after grading helped to show where we could improve. would have been nice to see before we did the assignment.
- ▶ See above regarding Online Meeting

### Question 27

What do you identify as the strengths of this instructor?

#### ∨ Collapse Responses

- ▶ Very good at communicating all of the information and having videos to help with assignments
- ▶ Willingness to help students and clearly answer questions.
- ▶ Great communication and help when needed. Fast to communicate back to students
- ▶ Professor Al-Odeh has has done an amazing job with this class. As we have come to know, his classes are thoughtfully constructed to optimize the capacity to achieve the learning goals.

This was a difficult course to present successfully in an online format due to the analytical math involved, but he did an amazing job of creatively compensating. The Panopto videos were awesome, the fast feedback for quizzes was wonderful, and helped to keep us on top of the material and on track with the pace.

Another thing that made this class different was the level of personal involvement of the instructor. I cannot emphasize how much of a difference that made in the quality of user experience!! For me, this was the closest to a classroom experience in an online format that I have had to date. Many thanks for the efforts done on our behalf!! ....it was greatly appreciated!

- ▶ The instructor is very intelligent!  
His Panopto videos were very helpful in learning the material.
- ▶ Good Outline for the course
- ▶ The use of the videos to explain how to solve the problems was nice.
- ▶ able to answer student question on timely
- ▶ Did a very good job at responding to questions from students and providing assistance with difficult questions or problems that needed additional explanation.
- ▶ Available for questions and responded in a timely manner. I have had Dr. Al-Odeh for multiple classes and am looking forward to future classes he teaches.
- ▶ Ability to explain any question asked.
- ▶ The instructor is helpful and willing to help students when they have questions.

### Question 28

What could the instructor do to improve this course?

#### ∨ Collapse Responses

- ▶ na
- ▶ n/a
- ▶ The only thing I can think of is that there was insufficient time in the schedule to prepare for the final. The last bit of assignment work and the final test were in very tight proximity. The quiz and last assignments were due by Tuesday night, and the final was Th - Sun. There was a lot of material to review, and to efficiently take such an exam requires enough time to ensure quick enough recall to manage the pace of <5min per question. Those of us who work long hours or couldn't juggle work were kind of hosed...you may know the material, but just need to feel comfortable with the pace and not stress. A week with a weekend for study would have been great...but I know the semester was a fast paced one with a lot of material tp cover.
- ▶ Find a text that is easier to learn from.  
Provide more Panopto videos. They were very helpful.
- ▶ N/A
- ▶ If there is a way to breakdown the information even more so that students who are not as strong in math can understand better.
- ▶ provide more example as the textbook was not helpful at all
- ▶ very good course.
- ▶ Quicker grading so we can get a better understand of where we need to focus on our weaknesses. There were times where assignemnts that were designed for test preparation we not graded prior to the test due date, so we didn't know if we were doing teh problems correctly.
- ▶ Make sure that the questions on the quizzes were covered in the homework.
- ▶ N/A

**Question 41**

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

▼ Collapse Responses

- ▶ the online videos, and the chapter book podcasts
- ▶ The group discussion forum was the most beneficial.
- ▶ Things that improved the course experience above other online courses were...
  - \* Panopto
  - \* instructor involvement
  - \* helpful and in-the-moment feedback
  - \* I very much enjoyed the persistent small group format! It provided a sense of belonging, synergy, and participation that was not just a required thing, but was value-added.
  - \* it was really nice to not have homework due over holiday weekends!! also a first I think..
- ▶ My determination not to fail.  
The Panopto videos and podcasts were great.
- ▶ The COurse outline
- ▶ The videos were very nice and working in the groups allowed me to see how others solved the problems which also helped out alot.
- ▶ Watching the video from the author and teacher worked best
- ▶ no comments
- ▶ Working on weekly assignments with a group, as well as the video walkthroughs the professor would post for difficult questions.
- ▶ Panopto videos were extermely valuable for explanations of questions that needed further clarification that the book had.
- ▶ Working with the same group members through out the whole course when assesing assignments. Worked well to bounce ideas off each other, or compare answers.
- ▶ The online discussion and group work are helpful.

**Question 42**

What made learning difficult for you?

My Home > 
 TADT 3267-90 Engine... 
 | 
 | 
 
 Mahmoud Al-Odeh

- ▶ The book and the videos associated with the book were very difficult for me understand.
- ▶ na
- ▶ It was a lot of material to cover, and required more time than any other class I have taken...unfortunate timing made it difficult to juggle with work. Almost dropped the class, but glad I stuck with it.
- ▶ My limited Excel experiance made this course very challenging.  
The lack of group involvement made asking questions and learning the concepts difficult.  
The textbook was very confusing and difficult to learn from.
- ▶ Some of the questions seemed to get the wrong answer and some of the questions were not clearly outline with all of the information
- ▶ The book is written poorly. The videos are much easier to follow.
- ▶ self studying
- ▶ Sometimes the book did not explain things very well
- ▶ The book is terrible. It does not expalin the concepts thoroughly enough to be able to answer the questions. There are errors in formulas which make it impossible to follow how the author got the answers that are provided. In some of the chapter questions, the provided answers for similar question solve them in completely different methods. Sometimes incorrectly.
- ▶ Just not understanding the book terminology sometimes.
- ▶ There were several times I found errors in the content. This made it frustrating and would make me second guess myself.
- ▶ N/a

**Question 43**

What suggestions do you have for future offerings of this course?

∨ Collapse Responses

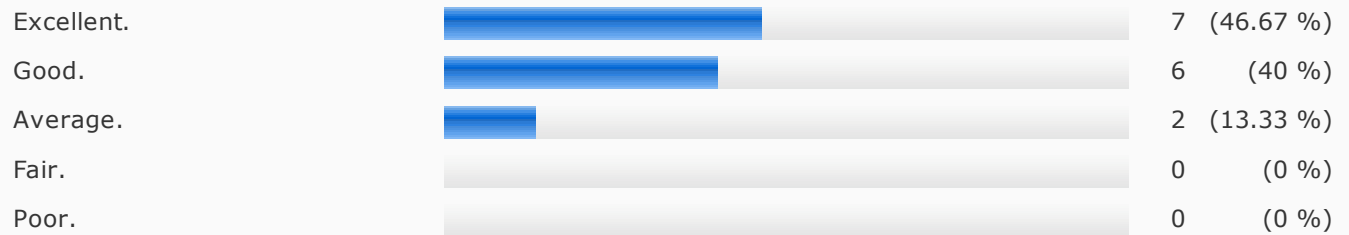

- ▶ Find better ways to lecture or present the information becasue the book is not very friendly to users with limited math skills.
- ▶ continue as is
- ▶ Can't think of anything else...nicely done...
- ▶ Encourage more group member involvement and support.
- ▶ more detailed questions
- ▶ Change to a differnt book or do all videos for examples
- ▶ the instructor should be more accessible

- ▶ Would not change anything, it was a good course.
- ▶ Find a new book. Create lecture videos on the chapters that enhance or replace the authors videos. They skip over some material that would have been helpful to have explained earlier rather than request a panopto video for explanation.
- ▶ None.
- ▶ Be sure content is correct before putting it out there for the students.
- ▶ N/A

**Question 28**

What could the instructor do to improve this course?

▼ Collapse Responses

- ▶ Not talk down to his student. This professor repeatedly made claims that we didn't respect him, while showing us little to know respect. The professor made student feel stupid if they spoke up in class and didn't get the answer right, even though the questions were often times poorly worded. (I wasn't the only one that felt this way) Also grammatical errors in the mid-term made it hard to understand what the professor was looking for, but he sure did a good job at making sure we all knew we did badly on it, and it was our fault.
- ▶ nothing was very well done

- ▶ I feel that sometimes it is confusing  
because try to slow down even on  
easier topics because portion of material  
adds up to the larger picture
- ▶ The explaining of the material. He understands it just struggles with communicating it to the students.
- ▶ Maybe do something different for the homework
- ▶ use a little more excel activities and learning activities teaching excel
- ▶ Make the assignments due on Sunday night instead of Saturday night. The majority of students complete their homework on Sunday.
- ▶ This was a difficult class took a lot of time and extra hours but overall it was a good learning experience.
- ▶ not as much jumping back and forth during the lectures.
- ▶ Not to much maybe less chapters and focus on the time value of money
- ▶ more work with excel
- ▶ Good format.
- ▶ Spend more time on the tougher sections in the book
- ▶ His method of teaching on the whiteboard can sometimes get slopping and confusing/ unorganized

**Question 41**

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

∨ Collapse Responses

- ▶ Group/Team work
- ▶ The need to pass this class to graduate and the wanting to learn the topics in general helped.
- ▶ Being in groups to do the homework really helps and being able to do the homework in class is a great idea.
- ▶ The homework assignments.

was easier to understand when mamud was there to teach it

- ▶ Reviewing how to do something until we all understood. For example, going over equations and how to solve problems out of the book.
- ▶ Active listening

### Question 42

What made learning difficult for you?

▼ [Collapse Responses](#)

- ▶ the bad; the book was hard to decipher if you learned the material out side of class. the good; examples were needed and provided in class.
- ▶ Speed of material was a little fast could've used two weeks per chapter instead of 1
- ▶ Sometimes too many assignments and quizzes.
- ▶ not having a very god background with excel made some of the homework difficult but with the help of the teacher and other students it was made easy.
- ▶ Nothing
- ▶ felt rushed on some assignments
- ▶ Doing the same kind of homework each week. It gets old and boring, which makes it more difficult to learn.
- ▶ nothing

### Question 43

What suggestions do you have for future offerings of this course?

▼ [Collapse Responses](#)

- ▶ just that assignments be due on Sunday instead of Saturday. personally I work the end of the week making it hard to find time to finish.
- ▶ Make tests more manageable in the time given
- ▶ Keep working hard and the more you know about the topics you're teaching, the faster and easier it will be for you to teach your students.
- ▶ the class should meet in the computer lab at least once a week

- ▶ Guest speakers and more real life case studies
- ▶ less out of class homework I feel like students could learn the best if they go over the problems as a class
- ▶ Teach more lessons using interactive methods. The LEAN activity was a fun change to what we normally do.
- ▶ more hands on activates

### Question 27

What do you identify as the strengths of this instructor?

#### ▼ Collapse Responses

- ▶ Clear and concise in assignments and expectations
- ▶ Easy to work with. Quick response to questions.
- ▶ Professor Al-Odeh is incredibly organized, able to present content and goals in a way that helps students to most efficiently approach the tasks and incrementally build upon a well presented foundation of knowledge! It enabled us to cover very complex topics in a way that might have been very difficult to do outside of a live classroom were it not done with such forethought.
- ▶ Good communication
- ▶ Clear communication
- ▶ Technical knowledge of materials
- ▶ Timeliness
- ▶ Very knowledgeable of the course and its content.  
Taught well and provided valuable methods of learning from a distance learning perspective.
- ▶ The ability to really explain how formulas and certain techniques can be used in such a way that anybody can understand them with little math or engineering knowledge needed.
- ▶ All around great instructor. Timely responses and great resources were provided.

### Question 28

What could the instructor do to improve this course?

#### ▼ Collapse Responses

- ▶ Nothing, it's perfect
- ▶ Nothing, he's awesome
- ▶ One thing (and I don't know the solution)...is that the homework and the quizzes for the same materials were due at the same time. If you didn't get something...you didn't have the feedback from the homework in time to correct ones thinking and have that reflected on the quiz. There is an advantage to having the quiz close to the time you are deep in the topic, but that is the trade-off I guess...
- ▶ Links to youtube lectures we very helpful, more would be good
- ▶ Introduce more collaborative tools for course work, ie google docs or the collaborating software within the BSU email

- ▶ Intro the final project earlier in term
- ▶ The course I thought was very well put together.  
The group discussions can sometimes be difficult due to everyone's schedules.
- ▶ Talk about Six Sigma or other lean techniques.
- ▶ Possibly post videos of personal lectures.

**Question 41**

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

[Collapse Responses](#)

- ▶ Clear expectations
- ▶ Presentation of information
- ▶ The final project was a great one for me...but I had a great partner to work with and we happened upon a great idea. So for me, it was very meaningful, but much was chance and it could, under different circumstances, been very frustrating under the timeframe allotted.
 

A pre-defined list of potential project scenarios might have been nice, but maybe part of the challenge was to pick a suitable scenario...

I don't really value the weekly discussions too much...but that's just me. I know it is part of collaborative learning methodologies...and it does help if in the end something meaningful is expressed for all to benefit from...
- ▶ The questions at the end of the chapter seemed to be the most on point for coursework. Having a group discussion, assignment and quiz all covering the same type of questions seemed redundant.
- ▶ Plenty of reference info and feedback on the assignments in a timely manner
- ▶ The book really helped me learn in this course. Also being able to share answers and ideas with classmates.
 

Then I was able to compare answers and see if I was heading in the right direction to complete the assignment successfully.

Often times I find myself skimming the book content and missing valuable information. But that is a personal learning habit.

When I would go back and read through the chapter, I would understand more clearly of what I was learning about.
- ▶ The hands on activities of learning about the many types of quality methods as well as how they are useful in situations and real world applications.
 

I found the book examples to be very helpful because they are real world examples on how quality can affect and contribute to business.

The discussions between students and instructor allowed me to learn from others and what their point of

- ▶ The groups while difficult to coordinate were very helpful. And cultivated an atmosphere where we were able to teach ourselves.

## Question 42

What made learning difficult for you?

### ▼ Collapse Responses

- ▶ Time with work schedule
- ▶ Nothing
- ▶ Didn't have feedback in situ for relatively difficult topics. This was mostly felt for the Process Capability section, for things and things that only came to my awareness after seeing the pre-formatted excel spreadsheet...specifically the usage of Estimated Standard Deviation for calculating Xbar charts...that bit in the book was not clear. (sbar - vs - Standard Deviation of Population - vs - Estimated Standard Deviation).
- ▶ Group work online can be very difficult.
- ▶ N/A
- ▶ Nothing really. Just focusing on what I had to do was important. Setting aside time to dig deep and learn, The instructor always provided quick answers to questions I had.
- ▶ Some of the students did not actively participate and that made more work for the rest of the group. I do not know of any way that can be resolved.

- ▶ Online learning is difficult in and of itself, the content of this course was pretty tough. Maybe a list of formulas for each type of calculation would have been beneficial.

**Question 43**

What suggestions do you have for future offerings of this course?

▼ Collapse Responses

- ▶ Keep as is,
- ▶ None
- ▶ Early tips on process capability....early tips on Estimated Standard Deviation.  
Some way to know our misperceptions prior to quizzes.  
Help getting people paired up for the final project...help getting them thinking properly about what is expected (we e-mailed a lot amongst ourselves to pool our understandings on what was expected for the project...)...which was kind of a nice experience in itself I suppose!  
More tips earlier on how to use excel for cell references, formulas, creating data sets for charts, etc. I think that to varying degrees those skills were new to many of us...but great to know!!  
Thanks for an awesome class!!! I was expecting tedium...(which some of data analysis is to some degree...) but it was pretty cool stuff!!
- ▶ More youtube lectures provided by professor, this way he can preview them to make sure they teach a similar message to what our professor is trying to teach.
- ▶ more collaborative options
- ▶ Pick the partners for the final project, its wasteful of time to try to get people who do not actually know each other to try to pair up using email as the primary communication means. Or make at least a discussion posting area for the purposes of pairing up so people can all see who has a partner and who does not.
- ▶ None, I thought it was great and learned a lot from it. Also it was beneficial to relate the content learned to my workplace. Very recognizable.
- ▶ Possibly add more of the advanced lessons in the book into the class.
- ▶ List of formulas.

**Question 41**

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

∨ Collapse Responses

- ▶ I thought the text for this class very good and explained things very well. The summary also help wrap up each chapter nicely. Dr. Al-Odeh did a great job in providing support on the more difficult problems to figure out. I really like the videoed excercises on how to solve the problems.
- ▶ The group activities helped increase learning and spread the knowledge around. Some individuals can understand topics faster/better than others and can explain it better than the book at times. Helping others that have questions also re-enforces the knowledge in the person answering the questions.

**Question 42**

what made learning difficult for you:

∨ Collapse Responses

- ▶ Nothing really
- ▶ Lack of time for the last few chapters as 2 chapters a week increased workloads. Although with a limited number of weeks decreasing workload is nearly impossible.

**Question 43**

What suggestions do you have for future offerings of this course?

**Question 27**

What do you identify as the strengths of this instructor?

∨ Collapse Responses

- ▶ This was my 3rd class taught by Dr. Al-Odeh and I am looking forward to many future classes with him. He is easy to work with and provides clear direction for the requirements of the class.

**Question 28**

What could the instructor do to improve this course?

∨ Collapse Responses

- ▶ Add comments to group work, specifically when members are lacking an effort. We had issues with a group memembr who didn't participate. We didn't ask for help until the end, but it would be nice if he could help encourage participation.

#### Question 41

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

∨ [Collapse Responses](#)

▶ Seeing videos of example problems was extremely helpful.

#### Question 42

What made learning difficult for you?

∨ [Collapse Responses](#)

▶ Personal activities and birth of a new child. There were times where the amount of work required was a lot, but I understand this was a condensed length class so we had to cover more in less time.

Group work was not always smooth. Relying on others to contribute was stressful when you did not know if they would submit their portion of the assignments.

#### Question 43

What suggestions do you have for future offerings of this course?

∨ [Collapse Responses](#)

▶ Move the 2 chapters of material per week a little earlier in the course to allow more time to focus on the final project.

▶ NO GROUP PROJECTS!!! Group projects for an online course are too dependant on other people to actually do their work. I do NOT feel that my grade should reflect the laziness of others!!!!

▶ No group projects. Completing a group project online is too difficult as you never see the people and it is more difficult to make sure others are doing their work.

**Question 41**

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

∨ Collapse Responses

- ▶ The assignments were not too lengthy, yet they were not too simple. I believe that the class was structured perfectly and it made learning the topics easy.
- ▶ The summaries for the readings really helped retain the information. Also I felt that some of the summaries could be longer as it was alot of information to sum up.

**Question 42**

What made learning difficult for you?

∨ Collapse Responses

- ▶ Not having the teacher/student interaction. Obviously it is difficult to do with online courses.
- ▶ It was a very good course. Learning was straight forward.

**Question 43**

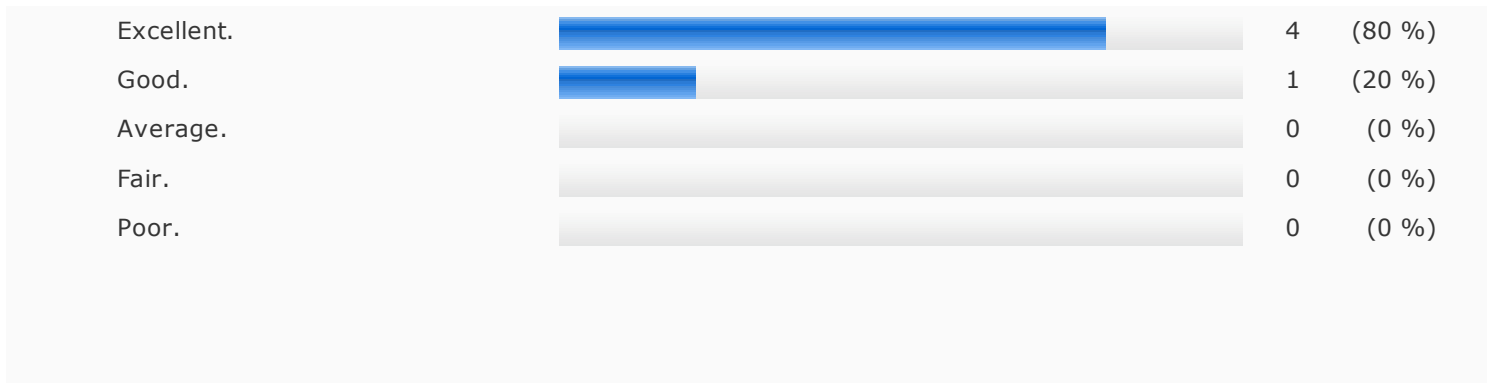

What suggestions do you have for future offerings of this course?

∨ Collapse Responses

- ▶ Utilize more discussions. Other than that, I greatly enjoyed the course.
- ▶ Nothing

**Question 27**

What do you identify as the strengths of this instructor?

▼ Collapse Responses

- ▶ The class content and supporting materials for classes taught by Professor Al-Odeh are highly organized and presented in such a way as to support students in their efforts to effectively balance school and work schedules.  
  
The content is timely and I have been able to readily apply the things I have learned to my work experiences.
- ▶ Provide a well organized course that emphasized key points in the curriculim.
- ▶ I think he does a good job of clearly laying out the expectations of the class.

**Question 28**

What could the instructor do to improve this course?

▼ Collapse Responses

- ▶ I would love to know what my mistakes are on the larger homework assignments...particularly if there was a major concept that I didn't quite grasp adequately. It has that intangibility issue that services have compared to products. Without the interaction of a face-to-face class, and without the benefits of papers returned with comments on them, there aren't any tangible checks and balances to assure that errors in understanding are corrected as part of the higher learning experience.
- ▶ Not sure.

**Question 41**

Please provide additional comments by answering the following questions. If you would identify specific aspects of the course in your answers, the instructor would appreciate it. Course changes are often based on student feedback.:

What facilitated your learning in this course?

▼ Collapse Responses

- ▶ The readings.
- ▶ The use of critical thinking involved assignments. Being able to think about the reading and not just answer multiple choice assignments.
- ▶ I think this course required a lot of in-depth thinking in understanding of the material. Simply because the textbook is not very good.

**Question 42**

What made learning difficult for you?

▼ Collapse Responses

- ▶ The shortened class schedule was a little challenging.  
The book topics were great, but the writing style was tedious and dry...but hey...some things are not easily made exciting, and the accelerated rate progression might have made it more difficult to sink in.
- ▶ The compacted structure of the summer course. It didn't leave as much time on certain topics as I would like.
- ▶ I think the textbook is horrible. It just doesn't read very well.

**Question 43**

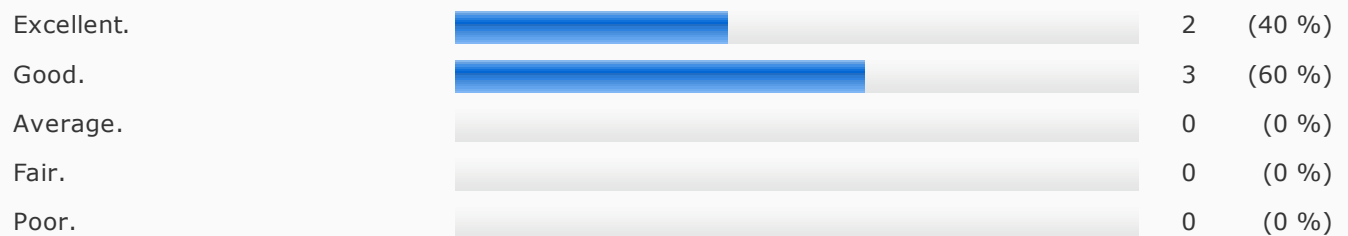

What suggestions do you have for future offerings of this course?

▼ Collapse Responses

- ▶ The text read like an encyclopedia..both in writing style and visual presentation, which made it a difficult read at times....particularly after a long day at work sitting in front of a computer screen. Not that I don't want to read technical writings, but it has the potential to be an exciting topic.  
  
Some color and excitement about strategy and planning for success might help make important concepts more memorable, and able to be applied appropriately when the time comes where it would be most helpful. Surfing the web for related content helped some.  
  
I enjoyed learning about business management concepts in the context of this course! It was immediatly useful to me and much appreciated. I couldn't discuss work too much, but it was definitely relevant.
- ▶ Find a different textbook to use, that does a better explaining the concepts then ask the students to build scenarios or situations of the understanding of the principals discussed using an improved textbook.

I was in a great team

The videos by Dr. Al-Odeh were so very helpful. The subtle skills provided in the videos for Microsoft Excel can be a huge time saver for students that are not familiar with the software.

N/A

Working with other people

Going through the questions using video explanations.

## Q6 - What made learning difficult for you?

What made learning difficult for you?

---

I didn't think we had enough visual explanations on solving problems

Group members that did not participate. There was no interjection or advice from the instructor when the student stopped participating in the group.

N/A

That only professor materials were used

Just having reading material when going over the chapter.

## Q7 - What suggestions do you have for future offerings of this course?

What suggestions do you have for future offerings of this course?

multiple visual explanations

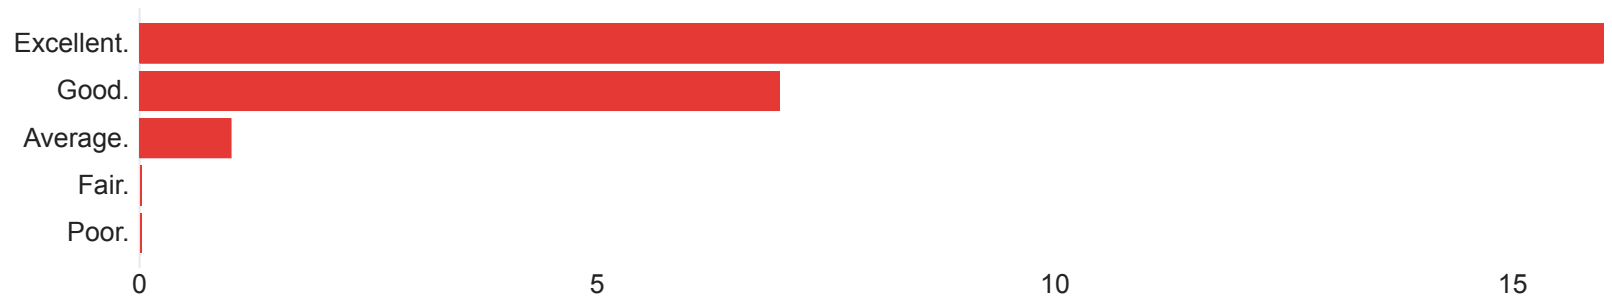

Group work can be difficult. The videos are hugely helpful and if you can also participate in the group discussions, at least once per week, (like a teacher visiting each table in an in-person lab environment), that would be helpful.

N/A

Find a way to better explain course material

Present the material/chapter using a video to go through the examples.
